Subject: Mock Surveillance Report

Angie, Thanks for the first draft of the mock report. It helped us get off to a good start. I have generated a second revision, which is attached, using the track changes feature. By highlighting my edits and additions, you can more readily identify questions or articulate concerns as it relates to these revisions.

Hans and Jane, I am forwarding this draft to you despite the fact that there remain a few gaps to be filled. However, I don't want to go too far down the road on this report if you think it needs to go in another direction - - so I would like your feedback sooner rather than later. Angie and I still have a 6/18-ish timeline to complete the report. In my mind, the objective of this exercise is not to create a perfect report but rather help manage expectations of the kinds of data to be collected for market surveillance. Jane, please feel free to share your thoughts with Hans or me.

Thanks to all.
